
Flask-Negotiate Documentation

Release 0.1.0

Matt Wright

April 03, 2013

CONTENTS

1	Resources	3
2	Install	5
3	Usage	7
4	Changelog	9
4.1	Flask-Negotiate Changelog	9
5	Indices and tables	11

Content negotiation utility for Flask apps.

RESOURCES

- [Documentation](#)
- [Issue Tracker](#)
- [Code](#)
- [Development Version](#)

INSTALL

Install with pip:

```
$ pip install Flask-Negotiate
```

USAGE

Create an app:

```
from flask import Flask
from flask_negotiate import consumes, produces
```

```
app = Flask(__name__)
```

Setup a route that will only consume requests with a *Content-Type* of *application/json*, otherwise return a HTTP 415 (Unsupported Media Type) error:

```
@app.route('/consumes_json_only')
@consumes('application/json')
def consumes_json_only():
    return 'consumes json only'
```

Setup a route that will only allow an *Accept* header of *application/json*, otherwise return a HTTP 406 (Unacceptable) error:

```
@app.route('/accepts_json_only')
@produces('application/json')
def consumes_json_and_html():
    return 'produces json only'
```

If you want to specify more than one Content-Type or Accept header just pass additional paramters:

```
@consumes('application/json', 'text/html')
def route():
    ...
```

CHANGELOG

4.1 Flask-Negotiate Changelog

Here you can see the full list of changes between each Flask-Negotiate release.

4.1.1 Version 0.1.0

Initial release.
